\*Provocholine® (methacholine chloride powder for inhalation) is indicated for the diagnosis of bronchial airway hyperreactivity in subjects who do not have clinically apparent asthma. WARNING: Provocholine® (methacholine chloride powder for inhalation) is a bronchoconstrictor agent for diagnostic purposes only, and should not be used as a therapeutic agent. Provocholine® inhalation challenge should be performed only under the supervision of a physician trained in and thoroughly familiar with all aspects of the technique of methacholine challenge, all contraindications, warnings and precautions, and the management of respiratory distress. Please consult the product package insert for more details.

## DEVICES ALSO AVAILABLE:
